ezH₂O[®] SURFACE MOUNT BOTTLE FILLING STATIONS

Refreshing, hands-free water delivery solutions for indoor spaces

Deliver cleaner, healthier water wherever you need it with Elkay's ezH2O® surface mount bottle filling stations. Designed for installations with limited wall depth, such as office buildings, medical facilities, school hallways and airports, this product portfolio puts healthier hydration within reach. Our award-winning ezH2O bottle filling stations uphold our commitment to delivering cleaner water and sustainable design. Touchless, sensor activation prompts a rapid fill of drinking water to quench thirst and minimize plastic bottle waste in the environment.

ezH2O Refrigerated Surface Mount Bottle Filling Stations

Refreshing, refrigerated water with touchless dispense.

Sensor Activated

Touchless, sensor-activated bottle filler is designed for hygienic hydration and easy hands-free use.

Easy Clean Up

Convenient, stainless steel metal grate provides a bottle rest platform for hands-free bottle filling; metal grate removes easily for ease of cleaning.

Save Bottles

Green Ticker™ informs users of the number of 20 oz. plastic water bottles saved from waste.

Filter Status Indicator

Visual filter monitor with LED filter status indicator for when filter change is necessary.

Maximize Space

A wall projection of just 12" maximizes hallway space.

Chilled Water

Hermetically sealed refrigeration system provides chilled water to satisfy thirst.

Clean Water

Filtered model available for cleaner, healthier water.

Chiller Option

Rough-in replacement allows replacement over existing plumbing and electrical lines for a refreshing, refrigerated hydration solution.*

*Compatible with EZ and EMAB Elkay models.

ezH2O Non-refrigerated Surface Mount Bottle Filling Stations

Convenient bottle filling stations for use in conjunction with a fountain or remote chiller. Choose between models with sensor activation or mechanical operation.

NSF/ANSI Certified

Filtered models feature Elkay water filters, which are tested and certified to the highest quality standards. See below for details.

Filter Status

Visual filter monitor with LED filter status indicator for when filter change is necessary.

Clean Fill

Laminar flow provides clean fill with minimal splash and 1.5 GPM fill rate.

Green Ticker

Informs users of the number of 20 oz. plastic water bottles saved from waste.

AquaGo 2004 / LZWSSM

Features touchless, sensor-activated bottle filler for hygienic hydration and easy hands-free use.

AquaGo 2003 / LMASMB

Includes push-button operation and may be used in areas where electrical is not available; other ezH2O features available through battery-powered operation.

Healthier Hydration Made Easy

Enjoy cleaner, healthier drinking water when you choose an ezH2O bottle filling station with filtration. Engineered for performance, our water filters are tested and certified to NSF/ANSI 42 and 53 for the reduction of harmful contaminants. This is important because contaminants, such as lead, can't be detected through sight, smell or taste.

- Reduces lead, cysts, Class I particulates, and chlorine taste and odor from drinking water.
- Designed to fit and certified for use within Elkay drinking water products for a seamless experience.
- Point-of-use, self-contained replaceable cartridges with quick-disconnect installation.
- Radial flow-thru design and ATS-treated activated carbon effectively treat incoming water. Most utilize a spun polypropylene prefilter mesh to prevent large, coarse sediment and particles from entering and clogging filter media.

Products with these designations have been certified to reduce certain contaminants from drinking water. Certifier varies; check product page for more information.
